

Q1. Create a new **ClusterRole** named **deployment-cluster**Role, which only allow to **create** the following resource types:

-> **Deployment**

-> **Stateful**

-> **DaemonSet**

Create a new **ServiceAccount** named **cicd-token** in the existing namespace app-team1.

Bind the new **ClusterRole deployment-clusterrole** to the new **ServiceAccount cicd-token**, limited to the **namespace app-team1**.

Answer:

```
# kubectl create ns app-team1
```

```
# kubectl create clusterrole deployment-clusterrole --resource=Deployment,StatefulSet,DaemonSet --verb=create
```

```
# kubectl create serviceaccount cicd-token -n app-team1
```

```
# kubectl create clusterrolebinding deployment-clusterrole --serviceaccount=app-team1:cicd-token --clusterrole=deployment-clusterrole
```
