

Manish Singh Bhandari

Greater Noida, Uttar Pradesh, India

+91-9711287629 | manishbhandari148@gmail.com

Professional Summary

Experienced Cloud & Platform Engineer with 14+ years of experience in IT infrastructure, Linux administration, cloud platforms, automation, and enterprise systems management. Hands-on experience in OpenShift, Kubernetes, OpenStack, and enterprise production support environments. Skilled in infrastructure automation, GitOps-based deployments, monitoring, troubleshooting, and platform operations across cloud and on-premises environments. Strong focus on operational excellence, reliability, and continuous learning.

Certifications

- Red Hat Certified OpenShift Administrator
- Certified Kubernetes Administrator (CKA)
- Red Hat Enterprise Linux OpenStack Platform Certified
- Red Hat Certified Engineer (RHCE)
- Red Hat Certified System Administrator (RHCSA)

Technical Skills

- **Cloud & Containers:** OpenShift, Kubernetes, OpenStack, Docker
- **DevOps & GitOps:** ArgoCD, Jenkins, Git, CI/CD
- **Automation:** Ansible, Bash Scripting, Puppet
- **Monitoring:** Prometheus, Grafana, Kibana, Nagios
- **Storage & Infrastructure:** Ceph, iSCSI, LVM, Pacemaker, HA Clustering
- **Operating Systems:** RHEL, CentOS

Professional Experience

NTT DATA Services Pvt. Ltd.

2021 – Present

Project: UPS (Current Project) – Client: UPS, USA

OpenShift & Kubernetes Administration

- Managed and supported enterprise OpenShift applications across Production and Non-Production environments.
- Performed OpenShift cluster upgrades and patching activities ensuring platform stability and minimal downtime.
- Added and removed worker nodes in OpenShift clusters for scaling and maintenance operations.

- Managed Kubernetes/OpenShift resources including Pods, Deployments, StatefulSets, Services, Routes, ConfigMaps, and Secrets.
- Implemented RBAC and namespace-level access controls for secure cluster operations.
- Performed troubleshooting and issue resolution using oc and kubectl.

GitOps & Application Deployment

- Deployed and managed applications using ArgoCD following GitOps practices.
- Managed synchronization and automated deployment workflows across environments.
- Installed, configured, and upgraded OpenShift Operators for platform and application services.

Monitoring & Production Support

- Monitored cluster and application health using Prometheus and Grafana dashboards.
- Participated in production support, incident troubleshooting, root cause analysis (RCA), and on-call rotations.
- Coordinated with application and infrastructure teams during deployments and maintenance activities.

Project: BMW

OpenStack & Infrastructure Management

- Managed OpenStack projects, instances, quotas, and storage resources.
- Provisioned and decommissioned compute and Ceph storage nodes.
- Performed infrastructure maintenance and coordinated with hardware vendors.

Ceph Storage Administration

- Managed OSD operations, cluster maintenance, and storage optimization activities.
- Performed storage troubleshooting, reweighting, and cluster health remediation.
- Maintained storage availability during patching and hardware replacement activities.

Automation & Monitoring

- Automated operational tasks using Ansible playbooks and reusable roles.
- Conducted infrastructure monitoring and daily health checks using Prometheus and Grafana.
- Configured Alertmanager for proactive alerting and monitoring.

Velocis Systems Pvt. Ltd.

System Administrator / DevOps Engineer

2017 – 2021

DevOps & CI/CD

- Managed Jenkins jobs, pipelines, plugins, RBAC, and distributed build environments.
- Configured parallel builds and automated CI/CD deployment workflows.
- Integrated Git repositories with CI/CD pipelines and managed branching strategies.

Linux & Infrastructure Administration

- Performed Linux OS hardening, patching, and vulnerability remediation.
- Managed enterprise Linux servers in production environments.
- Automated operational tasks using Bash scripting.

Monitoring & High Availability

- Installed and configured Nagios monitoring solutions.
- Implemented high-availability clustering solutions using Pacemaker.
- Supported Apache Tomcat environments and load balancing configurations.

Keen & Able Computers Pvt. Ltd.

Linux System Administrator

2012 – 2017

- Installed, configured, and maintained Red Hat Enterprise Linux and CentOS servers.
- Provided 24/7 L2 production support in high-availability environments.
- Troubleshoot OS and kernel-level issues to ensure system stability and performance.
- Automated deployments and system administration tasks using Puppet and Bash scripting.
- Managed Docker environments and infrastructure operations.
- Configured and maintained MySQL replication environments.
- Monitored infrastructure and handled incidents as per SLA requirements.

Education

- Master of Computer Applications (MCA) Integral University
- Bachelor of Science in Information Technology (B.Sc. IT) PTU University

Achievements

- Recipient of the Delivery Excellence Award (CDM) at NTT DATA Services
