Professional Summary

Cloud & Platform Engineer with 15 years of experience in Linux administration, infrastructure support, automation, and enterprise production environments. Hands-on experience in OpenShift and Kubernetes administration, including cluster operations, application deployments, monitoring, troubleshooting, and platform support.

Skilled in OpenShift, Kubernetes, Linux, Ansible, ArgoCD, and enterprise infrastructure management across production and non-production environments. Experienced in incident management, platform maintenance, CI/CD support, and infrastructure operations within enterprise environments.

Certifications

- Red Hat Certified OpenShift Administrator
- Certified Kubernetes Administrator (CKA)
- Red Hat Enterprise Linux OpenStack Platform Certified
- Red Hat Certified Engineer (RHCE)
- Red Hat Certified System Administrator (RHCSA)

Technical Skills

- OpenShift, Kubernetes, OpenStack, Docker
- ArgoCD, Git, CI/CD Pipelines
- Ansible, Bash Scripting, Puppet
- Prometheus, Grafana, Kibana, Nagios, Alertmanager
- Ceph, iSCSI, LVM, Pacemaker, High Availability Clustering
- Red Hat Enterprise Linux (RHEL), CentOS

Professional Experience

NTT DATA Services Pvt. Ltd.

Senior Cloud & Platform Engineer

2021 – Present

Project: UPS (Client: UPS, USA)

OpenShift & Kubernetes Administration

Environment: OpenShift 4.x, Kubernetes, ArgoCD, Prometheus, Grafana, RHEL

- Managed and supported enterprise OpenShift applications across Production and Non-Production environments.
- Supported day-to-day platform administration activities ensuring platform availability and operational reliability across enterprise environments.

- Performed OpenShift cluster upgrades, patching, and maintenance activities ensuring platform stability and minimal downtime.
- Added and removed worker nodes in OpenShift clusters for scaling and maintenance operations.
- Managed Kubernetes/OpenShift resources including Pods, Deployments, StatefulSets, Services, Routes, ConfigMaps, and Secrets.
- Implemented RBAC and namespace-level access controls for secure cluster operations.
- Performed troubleshooting and issue resolution using oc and kubectl.
- Installed, configured, and upgraded OpenShift Operators for platform and application services.
- Coordinated with application and infrastructure teams during deployments and maintenance activities.

GitOps & CI/CD

- Deployed and managed applications using ArgoCD following GitOps practices.
- Managed synchronization and automated deployment workflows across environments.
- Supported CI/CD deployment activities and release management processes.

Monitoring & Production Support

- Monitored cluster and application health using Prometheus and Grafana dashboards.
- Participated in production support, incident troubleshooting, root cause analysis (RCA), and on-call rotations.
- Collaborated with cross-functional teams for issue resolution, deployment activities, and infrastructure maintenance operations.
- Supported enterprise production environments ensuring platform availability and operational reliability.

Project: BMW OpenStack & Infrastructure Management

Environment: OpenStack, Ceph, Ansible, Prometheus, Grafana, Linux

- Managed OpenStack projects, instances, quotas, and storage resources.
- Supported enterprise cloud infrastructure operations and maintenance activities across production environments.
- Provisioned and decommissioned compute and Ceph storage nodes.
- Performed infrastructure maintenance and coordinated with hardware vendors.
- Supported platform operations across enterprise infrastructure environments.

Ceph Storage Administration

- Managed OSD operations, cluster maintenance, and storage optimization activities.
- Performed storage troubleshooting, reweighting, and cluster health remediation.
- Maintained storage availability during patching and hardware replacement activities.

Automation & Monitoring

- Automated operational tasks using Ansible playbooks and reusable roles.
- Conducted infrastructure monitoring and daily health checks using Prometheus and Grafana.

- Configured Alertmanager for proactive alerting and monitoring.

Velocis Systems Pvt. Ltd.

System Administrator / DevOps Engineer

2017 – 2021

DevOps & CI/CD

- Supported CI/CD deployment workflows and release management activities.
- Integrated Git repositories with CI/CD pipelines and managed branching strategies.
- Supported application deployment automation and operational improvements.

Linux & Infrastructure Administration

- Performed Linux OS hardening, patching, and vulnerability remediation.
- Managed enterprise Linux servers in production environments.
- Automated operational tasks using Bash scripting.
- Supported enterprise infrastructure and system administration activities.

Monitoring & High Availability

- Installed and configured Nagios monitoring solutions.
- Implemented high-availability clustering solutions using Pacemaker.
- Supported Apache Tomcat environments and load balancing configurations.

Keen & Able Computers Pvt. Ltd.

Linux System Administrator

2012 – 2017

- Installed, configured, and maintained Red Hat Enterprise Linux and CentOS servers.
- Provided 24x7 L2 production support in high-availability environments.
- Troubleshoot OS and kernel-level issues to ensure system stability and performance.
- Automated deployments and system administration tasks using Puppet and Bash scripting.
- Managed Docker environments and infrastructure operations.
- Configured and maintained MySQL replication environments.
- Monitored infrastructure and handled incidents as per SLA requirements.

Education

- Master of Computer Applications (MCA) – Integral University
- Bachelor of Science in Information Technology (B.Sc. IT) – PTU University

Achievement

- Recipient of the Delivery Excellence Award (CDM) at NTT DATA Services
